DETAILED ACTION

Claim Rejections - 35 USC § 103

- 1. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:
 - (a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negatived by the manner in which the invention was made.
- 2. Claims 1, 3, 5-7, 9-16, 18, 20, and 22-34 are rejected under 35 U.S.C. 103(a) as being unpatentable over Fontana 6,123,982.

Fontana teaches a method of coating yarn comprising forming a solution containing aloe vera, impregnating a yarn with said solution and drying. In addition, Fontana teaches that the coating can be applied using a bath, being passed over a coating roller or by being passed through two coating rollers. See column 4, lines 4-7 and 37-48; column 5, lines 4-7. This teaching would have rendered obvious the method steps contemplated by applicant because such steps are no more than obvious variants of a known process. The yarn necessarily would result in softer fibers.

Therefore, the teachings of Fontana would have rendered obvious the invention as claimed in claims 1, 3, 5-7, 9-16, 18, 20, and 22-34.

Claim Rejections - 35 USC § 102

3. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless -

Art Unit: 1774

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

4. Claims 2, 4, 8, 17, 19, 21 and 34 are rejected under 35 U.S.C. 102(b) as being anticipated by Fontana '982 as applied above.

Fontana is as applied above and teaches yarn impregnated with an aloe vera solution. The instant claims are product-by-process claims and though these claims are limited by and defined by the process, determination of patentability is based on the product itself. The patentability of a product does not depend on its method of production.

Accordingly, the teachings of Fontana anticipate the invention as claimed in claims 2, 4, 8, 17, 19, and 21.

No claims are allowed.

Conclusion

5. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.
